

S.B.M REAZUL KARIM

Software Engineer | Java, Spring Boot, Grails, ERP & Reporting Solutions

Dhaka, Bangladesh | +880 1303-045825 | sbmreazul@gmail.com | LinkedIn: Reazul Karim

PROFESSIONAL SUMMARY

Software Engineer with 4.5+ years of experience developing, enhancing, and supporting enterprise ERP, billing, customer management, VAT, and reporting solutions. Strong hands-on expertise in Java, Spring Boot, Grails, Hibernate/GORM/JPA, Oracle, MS SQL, PL/SQL, Jasper Reports, iReport, and Crystal Reports. Experienced in translating client and regulatory requirements into reliable application features, database objects, reports, and production deployments. Recognized for effective client support, structured problem-solving, and maintaining business-critical systems for utility and commercial organizations.

TECHNICAL SKILLS

Programming	Java, Groovy, C#, JavaScript, SQL, PL/SQL
Backend & APIs	Spring Boot, Spring MVC, Grails, .NET, REST API development and testing
Frameworks & ORM	Hibernate, GORM, JPA, Angular
Databases	Oracle 11g, Microsoft SQL Server 2012, database queries, functions, views, materialized views
Reporting	Jasper Studio, Jasper Reports, iReport, Crystal Reports
Tools & Platforms	Git, GitHub, GitLab, Bitbucket, Linux Server, WAR deployment
Domain Knowledge	ERP, utility billing, customer management, VAT/NBR compliance, accounts receivable, legal case tracking, client support

PROFESSIONAL EXPERIENCE

Programmer | Institute of Information and Communication Technology (IICT), BUET | Dhaka, Bangladesh

Sep 2022 - Present

- Develop and maintain enterprise ERP and billing functionality for Karnaphuli Gas Distribution Company Ltd. (KGDCL) and other gas distribution companies, supporting business-critical customer and operational workflows.
- Implemented customer management processes covering billing, disconnection, reconnection, load changes, customer type changes, and related service activities while preserving data consistency across interconnected modules.
- Designed and delivered a comprehensive Law Suit Management module for case registration, case status tracking, court information, panel-area management, lawyer registration, and follow-up activities.
- Created and customized operational and financial reports - including sales reports, ledgers, and accounts-receivable statements - using Jasper Studio and iReport according to client and management requirements.
- Developed and maintained configurable SMS and email templates for customer notifications, service updates, and other automated communications.
- Worked with Oracle databases and PL/SQL objects, including complex queries, functions, views, and materialized views, to support application features and reporting needs.
- Provided ongoing production support, investigated user-reported issues, coordinated with stakeholders, and delivered enhancements as business rules and client requirements evolved.
- Participated in Linux server deployment activities, including WAR deployment and application update verification.

Programmer | The Databiz Software Limited | Mirpur DOHS, Dhaka

Nov 2021 - Sep 2022

- Contributed to Bizzness Roots 2.0, an ERP solution supporting sales, purchase, VAT, and other core business processes for multiple clients.
- Designed and developed client-specific operational and management reports using Crystal Reports, translating business requirements into accurate report layouts and data logic.
- Worked on VAT-related features and reports to support National Board of Revenue (NBR) requirements and client compliance workflows.
- Developed new sales, purchase, and related ERP features based on customer requirements and existing application architecture.
- Implemented CRUD operations and data-grid functionality to improve the efficiency of master-data and transaction management.
- Provided technical support to clients, diagnosed application and reporting issues, and delivered fixes or configuration updates.

SELECTED PROJECTS

KGDCI ERP System | <https://erp.kgdcl.gov.bd/>

Project scope: Enterprise ERP platform for Karnaphuli Gas Distribution Company Ltd., supporting customer administration, billing-related service workflows, legal-case management, operational reporting, notifications, and day-to-day production support.

Technology stack: Groovy, Grails Framework, Oracle Database, PL/SQL, Hibernate/GORM, Thymeleaf, Jasper Studio and iReport; Linux server and WAR deployment.

- Develop and enhance customer-service workflows including billing activities, disconnection, reconnection, load changes, customer-type changes, and related utility operations.
- Perform application-facing Oracle database work, including complex SQL and PL/SQL queries, functions, views, materialized views, data investigation, and database logic required by ERP modules and reports.
- Implemented the Law Suit Management module for case registration, status updates, court information, panel-area administration, lawyer registration, and follow-up tracking.
- Design and customize operational and financial reports with Jasper Studio and iReport, including sales, ledger, and accounts-receivable reports based on stakeholder requirements.
- Maintain server-rendered screens with Thymeleaf, support Groovy/Grails backend functionality, troubleshoot production issues, and deploy application updates as WAR files on Linux servers.

BGDCL ERP System

Project scope: ERP implementation and continuing application support for Bakhrabad Gas Distribution Company Ltd., adapting shared gas-utility processes to organization-specific operational and reporting requirements.

Technology stack: Groovy, Grails Framework, Oracle Database, PL/SQL, Hibernate/GORM, Thymeleaf, Jasper Studio and iReport; Linux server and WAR deployment.

- Develop and maintain customer, service, and operational functionality using the existing Grails-based ERP architecture.
- Handle Oracle database activities for application features and reporting, including SQL/PL/SQL development, query analysis, functions, views, materialized views, and data-level troubleshooting.
- Prepare and modify iReport/Jasper reports to reflect BGDCL-specific business rules, formats, and management information needs.
- Investigate client-reported issues, implement organization-specific enhancements, validate fixes, and support production releases and ongoing system operation.

KGDCI Billing Portal | <https://billing.kgdcl.gov.bd/>

Project scope: Web-based billing portal that provides KGDCI customers with access to billing information and supports related online service operations.

Technology stack: Java, Spring Boot, Thymeleaf, Oracle Database, Spring MVC/JPA, REST APIs, and server-side rendered web interfaces.

- Develop and maintain Spring Boot components that connect portal workflows with billing data stored in Oracle Database.
- Build and update Thymeleaf-based user interfaces for presenting billing information and supporting customer-facing service actions.
- Write and optimize Oracle queries used by portal features, investigate data discrepancies, and coordinate application and database fixes.
- Support API development, functional testing, issue resolution, deployment verification, and continuous enhancement of the production portal.

SGCL ERP System | <https://erp.sgcl.org.bd/>

Project scope: Enterprise ERP platform for Sundarban Gas Company Limited, supporting customer and operational processes, reporting, and ongoing application support.

Technology stack: Java, Spring Boot, Angular, Oracle Database, Spring MVC/JPA, REST APIs, and Jasper reporting tools.

- Develop backend services and business functionality with Spring Boot and expose REST APIs for integration with the Angular frontend.
- Contribute to Angular screens and data-driven workflows used in customer-management and operational modules.
- Develop and maintain Oracle SQL/PL/SQL queries and database objects needed for application processing, reporting, and issue investigation.
- Create or update business reports, test end-to-end functionality, resolve client issues, and support production enhancements.

Bizzness Roots 2.0

Project scope: Commercial ERP solution supporting sales, purchase, VAT, reporting, and client-specific business processes for multiple organizations.

Technology stack: C#, .NET, Microsoft SQL Server, T-SQL, Crystal Reports, and data-grid-based business interfaces.

- Developed sales, purchase, VAT, and related ERP features according to client requirements and the application's existing .NET architecture.
- Implemented CRUD operations and data-grid workflows for master data and business transactions.
- Designed and customized Crystal Reports by translating operational requirements into report layouts, SQL queries, calculations, and business-ready outputs.

- Worked with SQL Server data and queries to support application logic, reporting, issue diagnosis, and client-specific enhancements, including NBR-aligned VAT requirements.
- Provided technical support, reproduced application and reporting problems, delivered fixes, and assisted clients with day-to-day system use.

EDUCATION

B.Sc. in Computer Science and Engineering | International Islamic University Chittagong | Chittagong, Bangladesh **2016 - 2021**

CGPA: 3.647 out of 4.00

Diploma in Mechanical Engineering | Feni Polytechnic Institute | Feni, Bangladesh **2007 - 2011**

CGPA: 3.12 out of 4.00

Secondary School Certificate (SSC) | Ghorashal Urea Sar Karkhana High School and College | Bangladesh **2007**

GPA: 4.06 out of 5.00

RESEARCH / THESIS

Forecasting Customer Churn with Machine Learning Approaches

- Studied machine-learning approaches for predicting future customer churn.
- Designed a predictive-system concept to identify customers with a higher likelihood of churn and support proactive retention decisions.

TRAINING & CERTIFICATION

ASP.NET Web Application Course | BITM, BASIS | Golpahar, Chittagong **Aug 2018 - Oct 2018**

Topics: Advanced C#, object-oriented programming, ASP.NET Windows Applications, ASP.NET Web Forms, and ASP.NET MVC.

ADDITIONAL EXPERIENCE

Teaching Assistant | International Islamic University Chittagong | Kumira, Chittagong **Jul 2021 - Dec 2021**

Supervisor: Dr. Jamshed Alam Patwary, Assistant Professor

Key subjects: Technical Writing and Presentation, Mathematical Analysis, and Computer Science

- Evaluated examination papers and supported academic assessment activities.
- Assisted students during laboratory sessions and helped facilitate practical coursework.
- Supervised student presentations during laboratory examinations.
